

LeetCode 100-Question Target Roadmap

A highly specific, curriculum-mapped preparation guide tailored to the exact hiring benchmarks of **TCS (Foundation & Digital)** and **PhonePe (Tier-1 FinTech SDE)**.

1. TCS 100-Question Map (Focus: Speed, Math & Implementation)

Target Split: 60 Easy | 40 Medium | 0 Hard. Focus on flawless syntax and edge cases.

Category	ID & Problem Name	Difficulty	Core Technical Concept / Strategy
Arrays & Matrices	1. Two Sum	Easy	Array hashing, linear lookups
Arrays & Matrices	26. Remove Duplicates from Sorted Array	Easy	Two-pointer in-place tracking
Arrays & Matrices	53. Maximum Subarray	Medium	Kadane's Algorithm for max bounds
Arrays & Matrices	121. Best Time to Buy and Sell Stock	Easy	Single pass tracking of lowest point
Arrays & Matrices	189. Rotate Array	Medium	Array reversal strategy
Arrays & Matrices	283. Move Zeroes	Easy	In-place element modification shift
Arrays & Matrices	48. Rotate Image	Medium	Matrix transpose and horizontal flip
Arrays & Matrices	54. Spiral Matrix	Medium	Layer-by-layer boundaries traversal
Strings Manipulation	125. Valid Palindrome	Easy	String cleanup and double pointers
Strings Manipulation	242. Valid Anagram	Easy	Frequency counter mapping array
Strings Manipulation	14. Longest Common Prefix	Easy	Vertical scan of string matrices
Strings Manipulation	58. Length of Last Word	Easy	Backward string scan and trimming
Strings Manipulation	3. Longest Substring Without Repeating Chars	Medium	Sliding window with frequency tracking
Strings Manipulation	5. Longest Palindromic Substring	Medium	Expand around potential centers
Strings Manipulation	49. Group Anagrams	Medium	Categorization using sorted keys
Math & Number Logic	9. Palindrome Number	Easy	Math parsing without string mutation
Math & Number Logic	50. Pow(x, n)	Medium	Binary exponentiation algorithm
Math & Number Logic	204. Count Primes	Medium	Sieve of Eratosthenes memory grid
Math & Number Logic	326. Power of Three	Easy	Recursive loop or mathematical check
Math & Number Logic	263. Ugly Number	Easy	Successive factorization reduction
Search/Sort & Hashing	704. Binary Search	Easy	Classic divide and conquer search
Search/Sort & Hashing	35. Search Insert Position	Easy	Lower bound indexing verification
Search/Sort & Hashing	34. Find First & Last Position in Sorted Array	Medium	Dual-modified binary search bounds

Search/Sort & Hashing	74. Search a 2D Matrix	Medium	Virtual flattening binary index search
Search/Sort & Hashing	217. Contains Duplicate	Easy	Set filtering comparison efficiency
Search/Sort & Hashing	169. Majority Element	Easy	Boyer-Moore Voting efficiency rule
Search/Sort & Hashing	347. Top K Frequent Elements	Medium	Frequency counting with Bucket sort/Heap
Structures & Basic Recursion	206. Reverse Linked List	Easy	Iterative pointer reassignment
Structures & Basic Recursion	21. Merge Two Sorted Lists	Easy	Dual-pointer structure threading
Structures & Basic Recursion	141. Linked List Cycle	Easy	Floyd's Tortoise and Hare detection
Structures & Basic Recursion	104. Maximum Depth of Binary Tree	Easy	Recursive tree traversal patterns
Structures & Basic Recursion	94. Binary Tree Inorder Traversal	Easy	DFS processing logic stacks
Structures & Basic Recursion	70. Climbing Stairs	Easy	Basic Fibonacci state accumulation

2. PhonePe 100-Question Map (Focus: Advanced Algorithms & System Logic)

Target Split: 0 Easy | 70 Medium | 30 Hard. Focus on extreme runtime efficiency and absolute correctness.

Category	ID & Problem Name	Difficulty	Core Technical Concept / Strategy
Advanced Graphs & Trees	207. Course Schedule	Medium	Kahn's Algorithm for Topological Sort
Advanced Graphs & Trees	210. Course Schedule II	Medium	Cycle detection in directed graphs via DFS
Advanced Graphs & Trees	743. Network Delay Time	Medium	Dijkstra's Shortest Path single-source state
Advanced Graphs & Trees	684. Redundant Connection	Medium	Disjoint Set Union (DSU) cycle monitoring
Advanced Graphs & Trees	297. Serialize and Deserialize Binary Tree	Hard	Tree encoding via Level-order traversal structure
Advanced Graphs & Trees	124. Binary Tree Maximum Path Sum	Hard	Post-order bottom-up local state aggregation
Advanced Graphs & Trees	236. Lowest Common Ancestor of a Binary Tree	Medium	Structural back-tracking tree intersections
Dynamic Programming Mastery	300. Longest Increasing Subsequence	Medium	1D state transition optimized with Binary Search
Dynamic Programming Mastery	1143. Longest Common Subsequence	Medium	2D grid state comparison metrics
Dynamic Programming Mastery	322. Coin Change	Medium	Unbounded Knapsack optimization arrays
Dynamic Programming Mastery	72. Edit Distance	Medium	State grid transformation path optimization
Dynamic Programming Mastery	416. Partition Equal Subset Sum	Medium	0/1 Knapsack space-optimized boolean array
Dynamic Programming Mastery	123. Best Time to Buy and Sell Stock III	Hard	State machine tracking 2 distinct transactional phases
Dynamic Programming Mastery	741. Cherry Pickup	Hard	Dual-simultaneous 3D grid path dynamic processing
Advanced Data Structures	23. Merge k Sorted Lists	Hard	Min-Heap structures for priority streams
Advanced Data Structures	84. Largest Rectangle in Histogram	Hard	Monotonic Stack element range bounding bounds
Advanced Data Structures	239. Sliding Window Maximum	Hard	Monotonic Deque boundary item storage processing
Advanced Data Structures	208. Implement Trie (Prefix Tree)	Medium	Nested prefix reference maps structure optimization

Advanced Data Structures	211. Design Add and Search Words	Medium	Trie mapping using regex wildcards
Backtracking & Structure Design	46. Permutations	Medium	State manipulation back-tracking arrays
Backtracking & Structure Design	79. Word Search	Medium	Matrix DFS path backtracking flags state
Backtracking & Structure Design	51. N-Queens	Hard	Diagonal bitmasking collision checks tracking
Backtracking & Structure Design	146. LRU Cache	Medium	Double Linked List linked with HashMap node storage
Backtracking & Structure Design	460. LFU Cache	Hard	Double Linked List structured matrix matching frequencies
